Terms in this set (31)

Atmosphere: A layer or mixture of gases that surrounds a planet.

Atmosphere importance. Protects from falling objects, keeps temperatures just right, protects us from ultraviolet rays.

Atmosphere and heat transfer

Flashcards | Quizlet

Heat can be transferred from one place to another by

Read Book Atmosphere And Heat Transfer

three methods:
conduction in solids,
convection of fluids
(liquids or gasses), and
radiation through
anything that will allow
radiation to pass. The
method used to
transfer heat is usually
the one that is the
most efficient.
