Installed it in my Cedar Creek 5th wheel replacing a WFCO 65 amp unit that was failing. It works perfectly. It requires #6 wire but will accept #4 wire which is thicker. I used the #4 because I had a 5 foot run to my power center to counter act the extra resistance of the wire. Both are available locally.

Lighting accounts for nearly 10% of electricity usage in households and 18-40% of commercial premises. There is a growing need for energy saving across the world, which is creating scope for the market. It is expected that the transition to energy-efficient lighting would reduce the global electricity demand for lighting by 30-40% in 2030.
