forces produce a net force of zero.

Therefore, an object experiencing balanced forces will not change its motion. This means that an object at rest will remain at rest if the forces are balanced. An object in motion will remain in motion if the forces are balanced.

Section 3 Acceleration

Acceleration: the rate  
at which velocity  
changes. Scientifically,  
Acceleration is  
described as changes  
in speed, changes in  
direction, or changes in  
both. Acceleration is a  
vector. An example of

#### **Notes**

**Section 1 Simple Harmonic Chapter 11 Motion Objectives**

- Identify the conditions of simple harmonic motion.
- Explain how force, velocity, and acceleration change as an object vibrates with simple harmonic motion.
- Calculate the spring force using Hooke's law.
