The Use of Enzyme Ratios. De Ritis described the AST/ALT ratio as being a useful indicator of the aetiology of hepatitis (e.g. acute viral hepatitis) 1 and his work was confirmed and extended by Wroblewski. 6 Over the following decades, subsequent studies using improved transaminase methods continued to confirm the original work. 7 - 9 Other enzyme ratios have also been suggested to have ...

### The De Ritis Ratio: The Test of Time

In clinical chemistry laboratories, data from 17 New York hospitals listed needle puncture (103 cases), acid or alkali spills , glass cuts (44), splash in eye (19), and bruises and cuts (45) as the most frequent exposures (21). Needle puncture, glass cuts, splash in eye, and bruises and cuts have the highest potential for infection from ...
