Coral reef restoration and management techniques are in ever-increasing demand due to the global decline of coral reefs in the last several decades. Coral relocation has been established as an appropriate restoration technique in select cases, particularly where corals are scheduled for destruction. However, continued long-term monitoring of recovery of transplanted corals is seldom sustained.

Effectiveness of coral relocation as a mitigation strategy ...

Coral Restoration Foundation™ (CRF) is the world's largest non-profit marine-conservation organization dedicated to restoring coral reefs to a healthy state, in Florida and globally. Coral Reef Restoration Handbook 1, Precht, William F ...

One answer is coral reef restoration. Such restoration efforts may turn out to be the ecological equivalent of genetic engineering, with equivalent sets of arguments for and against and with detailed procedures outlined prior to tailored implementation. The book consists of 20 chapters with a total of 38 contributors.

Coral Reef Restoration Handbook - Stachowitsch - 2008 ...

A new, first of its kind fund to protect coral reefs was officially launched today on the sidelines of the 75th Session of the UN General Assembly, with a coalition of partners convening to mobilise resources to make coral reefs more resilient. The Global Fund for Coral Reefs seeks to raise and invest USD \$500 million in coral reef conservation over the next 10 years.

New UN Multi-Partner Trust Fund for Coral Reefs | UNDP

The success and value of reef restoration measures that aim to establish a viable adult coral community, however, is in debate (e.g., Precht et al. 2005; Precht 2006), and is dependent on the nature of the disturbance (acute versus chronic).

Restoration of coral populations in light of genetic ...

Suspended in the nutrient-and-sunlight-rich water column, the fragments of corals on our Coral Trees grow into colonies that are large enough to be outplanted to the reef in just six to nine months.. After they have reached a substantial size, they are tagged and taken to a carefully selected reef restoration site where they are attached directly to the reef using a two-part marine epoxy.

Restoration Program | Coral Restoration Foundation

Introduction The ominous status of coral reefs worldwide and active reef restoration. Once acknowledging the vital ecological importance of coral reefs and their fundamental roles in sustaining hundreds of millions of people, it is dismaying to realize that over the last four decades ca. 40% of the global coral-reef system has been lost, a process galloping at 1–2% per year [], not ...
