Diagnosis And Management Of Neonatal

Although recent medical advances have improved neonatal care, many challenges remain in the diagnosis and management of neonatal infections. The diagnosis of neonatal sepsis is complicated by the frequent presence of noninfectious conditions that resemble sepsis, especially in preterm infants, and by the absence of optimal diagnostic tests.

Challenges in the Diagnosis and Management of Neonatal ...

Neonatal HSV is challenging to diagnose due to often vague signs and symptoms. Untreated, the mortality of some HSV subtypes exceeds 80%. Overtesting and overtreatment can result in prolonged hospitalizations and expose neonates to medication toxicity.

Diagnosis and Management of Neonatal Herpes Simplex ...

Contemporary Diagnosis and Management of Neonatal ...

Neonatal Diabetes Mellitus (NDM) refers to diabetes diagnosed within the first 6 months of life. It can be permanent (PNDM) or transient (TNDM) and both forms can be an isolated finding or in association with other features. Some patients with TNDM can go into remission and relapse few years later.

Diagnosis and management of neonatal diabetes mellitus: A ...

While neonatal diabetes may be recognized within the first few days of life, there are alternative causes of hyperglycemia in neonates, which can make the diagnosis of diabetes difficult. This is especially true in the preterm or low birth weight infant. 5 The prevalence of high glucose levels in preterm infants is 25-75 percent.

Neonatal Diabetes Mellitus: An Update on Diagnosis and ...

Neonatal leukaemia is typically presented with hepatosplenomegaly, leukaemia cutis and/or hyperleucocytosis. Congenital infections should be ruled out before diagnosis. Rearrangement of the MLL gene is the most frequently occurring genetic aberration.

Diagnosis and management of neonatal leukaemia - ScienceDirect

Genetic testing of the child and family members can be useful to confirm the diagnosis, but it is not readily available in most centers, and the results would not be timely enough to guide management of these critically ill neonates (see Goldenberg and Manco-Johnson 19 for a short list of laboratories offering this testing). Testing of a citrated plasma sample, collected prior to initiation of treatment, is therefore crucial for accurate diagnosis.

Diagnosis and management of neonatal purpura fulminans ...

1. Introduction. Thrombocytopenia (platelets $<150 \times 10^9/L$) is a common haematological finding in the newborn occurring in 1-2% of healthy term neonates.1, 2 The more preterm or sick neonates are, the more neonates tend to develop thrombocytopenia. Among sick neonates the incidence of thrombocytopenia is 18-35%.3, 4 In most cases neonatal thrombocytopenia is mild to moderate and resolves ...

Diagnosis and management of neonatal thrombocytopenia ...

This review provides an updated framework for the diagnosis and management of neonatal tachycardias. Keywords: arrhythmia, tachycardia, heart The most commonly presenting pathological tachycardia in the newborn is a narrow complex supraventricular tachycardia (SVT).

Neonatal tachycardias: an update

Infantile hemangiomas (IHs) are the most common tumors of childhood. Unlike other tumors, they have the unique ability to involute after proliferation, often leading primary care providers to assume they will resolve without intervention or consequence. Unfortunately, a subset of IHs rapidly develop complications, resulting in pain, functional impairment, or permanent disfigurement.

Diagnosis and Management of Infantile Hemangioma ...

However, diagnostic and clinical management of CeH is still nowadays a challenging condition due to the lack of accurate clinical and biochemical parameters. Very recently, a group of pediatric and adult endocrinologists have produced the 2018 Guidelines European Thyroid Association on the diagnosis and management of CeH .

The diagnosis and management of central hypothyroidism in 2018

NAIT is now recognized as an important complication of pregnancy that can present difficult diagnostic and therapeutic challenges. In this review, we will consider NAIT pathogenesis, diagnosis and management and will highlight areas of controversy that deserve the attention of clinical and laboratory investigators.

Neonatal alloimmune thrombocytopenia: pathogenesis ...

Current research on neonatal thrombosis is limited. It relies heavily on individual case reports and much of the data is extrapolated from the adult scientific literature. The aim of this descriptive study is to review the epidemiology, diagnosis and management of neonatal thrombosis at a single tertiary care institution.

Epidemiology, Diagnosis and Management of Neonatal ...

Clinical Microbiology and Infectious Diseases (ESCMD) and the European Confederation of Medical Mycology (ECMM) have developed a paediatric-specific guideline for the diagnosis and management of IA in neonates and children. Methods: Review and discussion of the scientific literature and grading of the available quality of evi-

ESCMD-ECMM guideline: diagnosis and management of ...

Management of Fetal and Neonatal Graves' Disease Fetal and neonatal autoimmune hyperthyroidism is a rare, serious but transient disorder. Early diagnosis and treatment are key objectives for an optimal prognosis and the well-being of the child. This review focuses on the management of these patients during the fetal and neonatal periods.

Management of Fetal and Neonatal Graves' Disease

Evidence pertaining to the optimal diagnosis and treatment strategies for neonatal abstinence syndrome is based on small or low-quality studies that focus on intermediate outcomes, such as need for pharmacologic treatment or length of hospital stay.

Neonatal Abstinence Syndrome: Advances in Diagnosis and ...

Neonatal hematology is a fast-growing field, and hematologic problems occur in the majority of sick neonates. Focusing on clinical issues and problem-solving, this is a fully revised and updated revision of a successful practical guide to the pathogenesis, recognition and management of hematologic problems in the neonate.

Neonatal Hematology: Pathogenesis, Diagnosis, and ...

Patient stabilization, seizure cessation, and determination of the etiology are key aspects of emergency department management. This issue reviews common presentations and causes of neonatal seizures, provides recommendations for management in the emergency department, and evaluates existing evidence regarding antiepileptic medications for treatment of neonatal seizures.
