The high pressure fuel  
injection pump  
increases the fuel  
pressure up to 169.96  
MPa (24,650 psi) and

# Access Free Diesel Injection Pump Repair

delivers fuel to the fuel rails through 2 high pressure lines, 1 per bank. The system pressure generated by the high pressure fuel injection pump is constantly adjusted by the powertrain control module (PCM) for every operational condition.

Fuel Injection**

Diesel fuel injection pump timing issues are more common in older engines and might be more commonly experienced by owners of old roadsters, tractors or similar engines. If it is an older diesel engine with a mechanical fuel injection pump , you will need to check for the type of crankshafts, pipes,

The Injection Pump Metering Control Circuit "A" is usually made up of a Fuel Rack Position (FRP) Sensor and a Fuel Quantity Actuator. The FRP sensor converts the amount of diesel fuel being delivered by the Fuel Quantity Actuator to the injectors into an electrical signal for the Powertrain Control Module (PCM).
