Problems 008 ...**

In mathematics, in the field of differential equations, a boundary value problem is a differential equation together with a set of additional constraints, called the boundary conditions. A solution to a boundary value problem is a solution to the differential

u_1 is the solution of an associated Poisson problem with zero boundary data, and u_2 is the solution of the Dirichlet problem with the given boundary data. We have $E_{mn} = -4\pi^2(m^2 + n^2)^{-1} \int_0^1 \int_0^1 f(x, y) \cos(m\pi x) \cos(n\pi y) dx dy$.
