Chemistry is the scientific study of the properties and behavior of matter. It is a natural science that covers the elements that make up matter to the compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position ...

Translational research at the interface of chemical biology and nuclear medicine The scientific premise of the Evans lab is that there are natural, and largely untapped synergies between chemical biology and nuclear medicine. For instance, molecular profiling technologies developed, refined, and applied by chemical biologists (e.g. proteomics, metabolomics) routinely glean
