The human body is the structure of a human being. It is composed of many different types of cells that together create tissues and subsequently organ systems. They ensure homeostasis and the viability of the human body. It comprises a head, neck, trunk (which includes the thorax and abdomen), arms and hands, legs and feet. The study of the human body involves anatomy, physiology, histology and ...

The mesentery of the small intestine is a large and broad fan-shaped mesentery that is attached to the jejunum and ileum of the small intestine, connecting them to the posterior abdominal wall. Superiorly, the mesentery of the small intestine is attached to the end of the duodenum/beginning of the jejunum (duodenojejunal junction) just to the left of the 2nd lumbar vertebra.

Mesentery: Anatomy, functions and clinical points | Kenhub

A gonad, sex gland, or reproductive gland is a mixed gland that produces the gametes and sex hormones of an organism. Female reproductive cells are egg cells, and male reproductive cells are sperm. The male gonad, the testicle, produces sperm in the form of spermatozoa. The female gonad, the ovary, produces egg cells. Both of these gametes are haploid cells. Some hermaphroditic animals have a ...

Gonad - Wikipedia

The scapula, also known as the shoulder blade, is a flat triangular bone located at the back of the trunk and resides over the posterior surface of ribs two to seven. The scapula, along with the clavicle and the manubrium of the sternum, make up the pectoral (shoulder) girdle which connects the upper limb of the appendicular skeleton to the axial skeleton.

Lymfocyt - Wikipedia

The human body produces two million blood cells deep in its bone marrow per second and pumps 1500–2000 gallons per day. Once formed, those red blood cells (RBCs) move into the bloodstream with white blood cells and platelets, all circulating through 60,000 miles of arteries, veins, and capillaries in the human body.

O corpo humano é a estrutura do ser humano. É composto por trilhões de células, a unidade fundamental da vida, que juntas são responsáveis pela formação de tecidos que protegem o organismo do mundo exterior, e vários outros que são responsáveis pela formação das cavidades internas. As células se agrupam e formam os órgãos, que são coleções estruturadas de células com ...
