Erik Brynjolfsson and Tom Mitchell described about suitable and unsuitable works for machine learning that is replaced from human works (1). I agree to it, and suggest issues for the following reasons: urgent demands to compensate for labor shortage, and over-technologies for realistic demands.

What can machine learning do? Workforce implications

Crystal skulls are human skull hardstone carvings made of clear or milky white quartz (also called "rock crystal"), claimed to be pre-Columbian Mesoamerican artifacts by their alleged finders; however, these claims have been refuted for all of the specimens made available for scientific studies. The results of these studies demonstrated that those examined were manufactured in the mid-19th ...

Crystal skull - Wikipedia

Overtime wages are a type of increased payment that employees can earn when they work more than a certain number of hours in a workday or workweek. Most non-exempt employees in California have a legal right to receive overtime wages when they work long hours.¹ The amount of overtime depends on the length of the employee's shift and the number of days he or she has worked in the workweek.
