[OpenWrt Wiki] Developer guide

So, an OpenWrt firmware is made by assembling packages around a Linux kernel. Each package is compiled separately and then when it's all done the needed packages are "installed" in a temporary folder that will then be compressed to become the compressed-read-only partition (squashfs) in the device firmware.

1. The context. If you are reading these notes, chances are quite high that you ALREADY rely on OpenWRT for some of your needs (Wireless; Embedded; etc.).. In my case, I own a nice TP-Link WDR4300 that loooong time ago was “upgraded” to OpenWRT. For various reasons, last week I decided to run on it a software (pmacct, indeed) that was NOT included in the official package repository.
