The cell (from Latin word 'cellula' meaning "small room") is the basic structural and functional unit of life. Every cell consists of a cytoplasm enclosed within a membrane, which contains many biomolecules such as proteins and nucleic acids.. Most plant and animal cells are only visible under a light microscope, with dimensions between 1 and 100 micrometres.

1. Overview 1.1 Historical Considerations. Developmental biology is the science that investigates how a variety of interacting processes generate an organism's heterogeneous shapes, size, and structural features that arise on the trajectory from embryo to adult, or more generally throughout a life cycle (Love 2008; Minelli 2011a).

[p. 370] I. INTRODUCTION. In a previous paper various propositions were presented which would have to be included in any theory of human motivation that could lay claim to being definitive. These conclusions may be briefly summarized as follows: 1. The integrated wholeness of the organism must be one of the foundation stones of motivation theory.
