Control over multiple Hytera DMR networks from single server. Private and group calls. Call recording. Text message exchange.

Release Notes

The files you need depend on the radio you've got. So long as you don't have a PD365, then the V7 CPS and firmware files will work for you. They are common over most of the Hytera range. The V5.30 USB driver works for most radios, there are 64 and 32 bit versions. The one you want depends on your version of Microsoft Windows.

Check out the notes below for this version of Thunderbird. As always, you're encouraged to tell us what you think, or file a bug in Bugzilla. Thunderbird version 78.2.1 is only offered as direct download from thunderbird.net and not as an upgrade from Thunderbird version 68 or earlier. A future release will provide updates from earlier versions.
