ICANN WHOIS

A domain name, or URL, is your website's address. You can customize your domain name to your store.

Domain names can end in .com, .org, .gov, and even more creative things like .co or .io. It's important to choose a domain name that's easy to remember and spell so customers can find you.

A domain name is a 'friendly' name for a set of numbers called IP addresses. A system called DNS (Domain Name System) keeps track of which friendly name matches to which IP address. A domain name makes it easier for users to find information online, send email and above all it can give you an identity, so that you're not just a set of numbers!
